

JUBILEE SCHOOL
Tulse Hill, London

Date
2001 - 2002

Architect
Allford Hall Monaghan Morris

Project Value
£4.0m

Project Status
Completed: 2002

Awards
Civic Trust Award 2002

This two form entry primary school located in Brixton, South London is an amalgamation of 3 previous Primary Schools and has an area for special needs children and a Sure Start unit. It is designed to operate as a civic centre as well as a traditional school. Classrooms run East to West to ensure they all receive good daylight and passive gains in Summer.

Low energy solutions and recycled materials featured highly in the design. Each classroom has its own terrace / balcony to control solar gain and is naturally ventilated using manually operated windows and vent chimneys. The facades have both high and low level opening panels.

Natural day-light is used where possible, including skylights on the upper floor, and individual automatic dimming controls in the classrooms control energy usage.

Underfloor heating is arranged in zones, so that only areas which are in use are heated, saving energy and costs.
